

4' x 8' Holding Cell

SPECIFICATIONS

SIZE: 96"(l) x 48"(w) x 96"(h)

WEIGHT: 1200lbs

The Holding Containment Cell is a portable module designed to securely restrain, isolate, and control an individual under legal apprehension. This is an ideal product for civilian law enforcement or military police who may need to detain people without being able to leave their post or premises.

The HCC is an all-aluminum welded system that is configured in a 4' x 8' design. The door latches at three points with a full hinge with two access doors for easy placement of handcuffs and shackles. The aluminum is weather resistant and will provide years of long lasting, durable use. The HCC is easily erected with 2-4 men and can be accomplished in approximately one hour.
