

DROP ARM BARRIER GATE

Manual Drop Arm Gate is available in 8', 12', or 16' openings. It locks in either open or closed position. Counter weighted to reduce force to open or close gate. Shipped unassembled on 4'x 4' skid.

Beam is manufactured using aluminum tubing and then powder-coated Safety Yellow for visibility. Engineering grade reflective tape for increased visibility is used.

Frames are anchored to concrete pads (customer supplies) with included red head anchors. Gate can be recovered, moved and reassembled easily.
