

4' Urban Terrorism Barricade

SPECIFICATIONS

SIZE: 4'(l) x 44"(w) x 45"(h)

CAPACITY: 260 gal

COLORS: Tan Granite
Gray Granite

This plastic portable barricade can be positioned without heavy equipment or engineering support. The quick fill, with water or sand as ballast, affords a major step in provided protection in most applications.

Simply drain the water and reposition as necessary. The 18" deep x 24" wide plant area is ideal for flowers or small shrubs, for full effect in disguising the barricade.

The 4' long x 4' high x 3' wide barricade, with nicely round corners, make this a very attractive item with the ability to function as a major factor in your Force Protection and Anti-Terrorism Program. In a Navy Seal test, 36" wide of water was shot three times with a 9mm and three times with a 7.62mm. The rounds did not go through.

This product is ideal to protect and provide security for gate entrances, doors, parking lot dividers, and most any type of building, such as: military, state, federal, as well as U.S. embassies. Custom colors are available. Other shapes and sizes can be built to your individual idea or specification. The barricade is cheaper than concrete and easier to handle.
