\*w/water: 175lbs

**SIZE: 36"(l) x 36"(w) x 36"(h)**

EMPTY WEIGHT: 55lbs

\*w/water: 255lbs

Designed as a restrictive movement and traffic control device, this product is formidable, efficient and versatile. Unlike the bollard, the Plastic Dragon's Tooth is capable of being utilized as a single unit or chained together to create a temporary vehicle barrier. Once the need has been eliminated the Dragon's Tooth can easily be repositioned elsewhere or stored for later use.

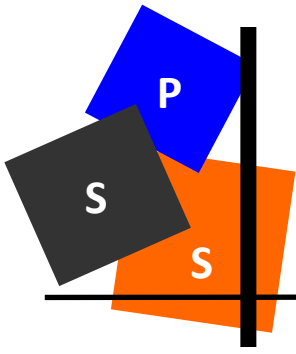

This product also has the capability of controlling the flow of vehicular traffic. Simply connect the individual units together by threading an optional steel chain or cable through the heavy-duty ring hooks on the rebar posts to create a quick and efficient control system.

# Dragon's Tooth Barrier

---

The Dragon's Tooth is constructed of high quality Polyethylene plastic. Simply position the empty Dragon's Tooth in position and fill with water. The Plastic Dragon's Tooth is available in any color upon request. For increased visibility, it is available with reflective tape applied to the sides of the Barricade. A light is available as an option that can be attached to the top of the barricade. When not in use, the Dragon's Tooth can easily be stacked. This product is a great addition to your overall security plan.

Chain Kit sold separately.
