

# Heavy Duty Stanchion

---

## SPECIFICATIONS

SIZE: 18" diameter x 48"(h)

EMPTY WEIGHT: 20lbs

\*w/water: 65lbs

\*w/sand: 120lbs

COLORS: Safety Yellow, Safety Orange, Red, or Concrete

The Stanchion is manufactured of rotationally molded plastic using water or sand as ballast. The separate post slips out from the bottom of the base thus lending ease for assembly and storage. The 1/4" nominal thickness of plastic plus the weight when filled with ballast affords the unit more stability from high winds or jet blast. Each unit weighs 18.5 lbs. empty, 65 lbs. when filled with water and 120 lbs. when filled with sand. We have molded a 3/8-16 stainless steel thread insert in the top of the unit post to allow installation of a reflector, handle, sign, plastic tape or many other uses. Reflective tape stripping can be applied. Great for flight lines, sports events, parking lots, air shows, restricted areas and crosswalks, just let your imagination take over. Can be used for defensive cover and is small enough to go in a plane pod.
