

Tire Shredder

SPECIFICATIONS

SIZE: 36"(l) x 22"(w)

WEIGHT: 125lbs

COLOR: Safety Red

Tire Shredder and Directional Controller is easily installed to an existing roadway with no excavating or asphalt cutting. The low profile allows for smooth passage in the allowed position. Teeth are spring loaded and retract as the vehicle drives over it. The teeth can be locked down to allow travel over it in both directions. Manufactured in 1/4" thick hot rolled steel for lasting durability, the all-welded construction is fabricated in 3 foot sections to customize your traffic lane width.
